Summary

I am a versatile IT Professional with a career path evolving from deep hardware and networking expertise to advanced full-stack web development. My background, combined with a degree in Web Technology and Design from the Estonian Entrepreneurship University of Applied Sciences (Mainor), allows me to bridge the gap between technical infrastructure and user-centric digital solutions.

My Core Competencies:

Web Development: 3.5+ years of experience in the WordPress ecosystem (Custom Themes/Plugins, WooCommerce, SEO optimization, Ahrefs). Proficient in Laravel framework, JavaScript, and SQL databases.

IT Infrastructure & Networking: Strong technical foundation from Tallinn Polytechnic School and hands-on experience at Ericsson AS. Skilled in network configuration (Cisco), server maintenance (Apache, MS SQL), and system administration.

Design & Prototyping: Professional proficiency in Adobe Illustrator, CorelDraw, and AutoCAD to create visually precise and functional prototypes.

I am passionate about building solutions from scratch and automating complex processes. I am currently open to new challenges in Web Development, IT Management, or Full-stack projects where I can apply my diverse technical toolkit.

Work experience

Developer

DIGITUUL OÜ / Estonia

digituul.ee/

Jun 2022 - Nov 2025 (3 y. and 6 m)

Information Technology

End-to-end website development and maintenance within the WordPress ecosystem.
